Small Decal Application Instructions

Step 1: Clean surface with mild soap and water then dry well, remove any remaining dust particles.

Step 2: Your decal comes with a transfer liner and backing paper, press them down with a credit card from both sides to assure good adhesion.

Step 3: With the decal laying face down on a hard surface, start at one corner and slowly peel the thicker backing paper away at an angle parallel to the surface. If the decal remains on the backing paper, gently lay the transfer back down, repress it with your credit card, and repeat.

Step 4: Holding the decal with both hands line up the decal where you want to place it and set the center down first slowly dropping the sides down until flat pressing decal down as you go. *Make sure to get placement right, once decals are installed they are PERMANENT. We suggest laying the decal over your item with the backing paper attached to test placement.*

Step 5: Press down decal left and right / top and bottom all STARTING FROM THE CENTER. Using a card or fingers press out any remaining air pockets from the center out. Be careful if using a card or other object not to scratch your item.

Step 6: Slowly peel back the transfer tape and the decal will remain on the surface. (Pull tape off parallel to the surface not up, this will help the vinyl stay in place and not pull it up).

Step 7: Press down over the decal one last time to ensure all edges are properly adhered and go show off your new decal!
